1. Introduction & System Overview

Nomas Apparel is an integrated retail platform with:

- **Online storefront** — customers browse, wishlist, cart, checkout, track orders, leave reviews.
- **Admin dashboard** — manage products, categories, orders, users, content, settings, and reports.
- **Point of Sale (POS)** — in-store sales on phone/tablet/desktop, with receipts and WhatsApp sharing.
- **Inventory tools** — stock levels, stock takes, vendors, coupons, and returns.

Live URLs

Store: <https://nomas.elgontech.co.ke>

Staff login: <https://nomas.elgontech.co.ke/admin/login>

2. Roles & Access Levels

Role	What they can do
Super Admin	Full access to every module, including users, roles, permissions, backups, and system settings.
Admin	Full store operations and user administration (create/edit staff, assign roles, manage settings).
Manager	Day-to-day store operations: POS, products, stock, reports, coupons, vendors. Limited user/role changes. No database restore.
Cashier	POS sales, view sales/orders, process returns, open/close cashier shifts. Dashboard access.
Stock Manager	Products, categories, stock takes, and inventory-related reports.
Customer (User)	Shop online, wishlist, checkout (login required), My Orders, cancel/return requests, reviews, Q&A.

Note: Menus you see depend on your role. If a button or page is missing, ask an Admin to check your permissions.

3. Getting Started (Staff Login)

1. Open `https://nomas.elgontech.co.ke/admin/login`
2. Enter your staff **email** and **password**.
3. You land on the **Dashboard** (or POS, depending on role).
4. Use the sidebar (or mobile menu) to open modules.
5. Tap your **avatar** (top right) for profile or logout.

Install as an App (recommended for cashiers)

On Android Chrome, open the admin/POS site and use *Install app* / Add to Home Screen. The launcher icon uses the Nomas logo. Uninstall and reinstall if you still see an old placeholder icon.

Update your profile

1. Open **My profile** from the avatar menu.
2. Update name or password.
3. Save changes.

4. Admin / Super Admin Guide

Admins configure the store, catalogue, staff, and online content.

4.1 Dashboard

- Quick actions (Add Product, Sales History, POS, etc.)
- KPIs: orders, revenue signals, stock alerts, blog/contacts
- Recent orders and low-stock products

4.2 Products & Categories

1. Go to **Products** → **Add Product**.
2. Enter name, price, sale price (optional), stock, SKU/barcode, category, image, description.
3. Save. Product appears in the online shop and POS.
4. Use **Categories** to organise products (Suits, Shoes, Bags, etc.).
5. Use bulk update / CSV export tools when available for mass changes.

Keep SKU/barcode accurate — cashiers scan these in POS.

4.3 Orders (Online & POS)

1. Open **Orders** to see all sales.
2. Filter by status (pending, paid, shipped, delivered, cancellation/return requested, cancelled).
3. Open an order to update status, view items, invoice/email options, and customer notes.
4. Watch for **Cancellation requested** and **Return requested** banners from customers.

4.4 Coupons

1. Open **Coupons** → create a code, discount type/amount, and validity rules.
2. Customers can apply codes at online checkout; cashiers can apply them in POS.

4.5 Vendors & Payouts

- Manage supplier/vendor records under **Vendors**.
- Record and mark vendor payouts; export CSV when needed.

4.6 Content & Storefront

- **Blog** — publish posts customers can read/comment on.
- **Reviews / Questions** — approve or remove product reviews and Q&A.
- **Settings** — site name, logo, tagline, colours, favicon.
- **Contacts / About / Services** — store contact details and site content.
- **Enquiries & Newsletter** — view customer messages and subscribers.

4.7 Users, Roles & Permissions

1. Open **Users** → create staff accounts (email + password).
2. Assign a role: Super Admin, Admin, Manager, Cashier, Stock Manager.
3. Use **Roles / Permissions** only if you need custom access (Super Admin).

Never share Super Admin credentials. Create separate accounts per staff member.

4.8 Backups & Settings

- Create database backups regularly from the Backups module (if enabled for your role).
- Restore is restricted to high-privilege roles — use carefully.

5. Manager Guide

Managers run daily operations without full system administration.

- Use **POS** for walk-in sales.
- Manage **Products**, **Categories**, **Stock Takes**, **Coupons**, **Vendors**.
- Process **Orders** and **Returns**.
- Review **Reports** and cashier performance.
- May create/edit some users and assign roles (depending on setup).
- Cannot restore database backups.

6. Cashier Guide (Point of Sale)

Cashiers complete in-store sales quickly on mobile or desktop.

6.1 Open POS

1. Login at Admin → open **POS** (or go to `/admin/pos`).
2. Optional: open a **Cashier Shift** before selling (Shifts module).
3. The black header stays sticky and shows today's sales summary.

6.2 Make a sale

1. Search by name / SKU / barcode, or tap a category chip.
2. Tap **Add** on products (2 per row on phone).
3. Open **View Cart & Checkout** (bottom bar on mobile).
4. Adjust quantities with `- / +`, or remove items with `x`.
5. Optional: enter coupon code → **Apply**.
6. Optional: customer name/phone under Customer Information.
7. Choose payment method: Cash, M-Pesa, Card, Bank transfer.
8. For **Cash**: amount received auto-fills with total; enter more only if giving change.
9. Tap **Complete sale**.

6.3 Receipt

- **Print Receipt** — use 80mm thermal paper; disable browser headers/footers.
- **WhatsApp** — share receipt text to the customer.
- **Share** — phone share sheet (Telegram, email, etc.) or copy text.
- **SMS** — open SMS with receipt text.
- **New Sale** — start the next transaction.
- **View Order** — open the saved order in admin.

6.4 Returns (Cashier)

1. Open **Returns** → Create.
2. Find the order by receipt/order number.
3. Select items/qty, reason, refund method.
4. Submit — stock is restored according to the return process.

6.5 Shifts

1. Open **Shifts** → start shift with opening cash.
2. Process sales during the shift.
3. Close shift with actual cash counted; system compares expected vs actual.

7. Stock Manager Guide

1. **Products** — update stock quantities, prices, images, barcodes.
2. **Categories** — keep catalogue structure clean.
3. **Stock Takes**:
 - Create a stock take (optionally filter by category/vendor).
 - Start counting → enter physical counts.
 - Send for review → Admin/approver **Approves** to apply inventory adjustments.
 - Cancel if the count should be discarded (stock unchanged until approve).
4. Check **Reports** for inventory-related insights.

Physical stock does not change until a stock take is approved.

8. Customer (Online Shop) Guide

8.1 Browse & search

- Open the store homepage.
- Use Search, All Categories, Shop, Blog, Contact.
- Flash Sale and Featured Products show View + Add to Cart.

8.2 Account

1. **Register** or **Login** (required before checkout).
2. When logged in, tap the round avatar (top right) for My Orders, Wishlist, Logout.
3. Account quick link opens My Orders.

8.3 Cart & Checkout

1. Add products to cart from listing or product page.
2. Open Cart → update quantities or apply coupon.
3. Proceed to Checkout (login/register if needed).
4. Confirm name, email, phone, shipping address.
5. Choose payment: Cash on Delivery, Mobile Money, Bank Transfer, or Card.
6. Place Order and keep your order number.

8.4 Wishlist, reviews, tracking

- **Wishlist** — heart icon on products (login required).
- **Reviews** — rate with clickable stars ★ and leave a comment.
- **Track Order** — public tracking page with order details.
- **My Orders** — view order history on mobile-friendly cards.

8.5 Cancel vs Return (important)

Order status	Customer action
Pending / Processing	Request cancellation

Order status	Customer action
Paid / Shipped / Delivered	Request a return only (cannot cancel)

Staff then process the request in Admin → Orders / Returns.

9. Orders, Returns & Cancellations

Staff workflow

1. Customer submits cancel or return request from My Orders.
2. Order status becomes *cancellation_requested* or *return_requested*.
3. Admin/Manager opens the order, reviews reason, then updates status or processes a return.
4. For returns, use **Returns** → **Process Return** to restore stock and record refund method.

10. Reports & Shifts

- **Reports** — sales summaries, exports, vendor commissions CSV.
- **Cashier performance** — compare cashier sales/returns.
- **Shifts** — opening cash, expected cash, closing variance.

11. Tips, Security & Troubleshooting

Issue	What to try
Cannot see a menu	Your role lacks permission — ask Admin to assign the correct role.
Checkout blocked	Customer must login/register first.
POS page cut off on phone	Hard-refresh or reinstall the PWA. Use latest POS layout (2 products per row).
Wrong app icon	Uninstall staff app → reopen site → Install again.
Receipt won't print correctly	Select 80mm paper; turn off headers/footers in the browser print dialog.
Forgot password	Ask an Admin to reset the staff password from Users.
Stock wrong after sale	Confirm the sale completed; check Returns and Stock Takes.

Security checklist

- Use unique staff accounts — do not share logins.
- Logout on shared tablets after shifts.
- Change default passwords immediately.
- Only Super Admin should manage roles/permissions and restores.

Quick Reference — Common Paths

Task	Where
Staff login	/admin/login
Dashboard	/admin
POS	/admin/pos
Orders	/admin/orders

Task	Where
Products	/admin/products
Stock takes	/admin/stock-takes
Returns	/admin/returns
Reports	/admin/reports
Customer shop	/
Customer login	/login
My Orders	/my-orders
Track order	/track-order
